

Nicole Jepkemoi Kipkorir

Software Developer

+254 798-705-799 | nicolekipkorir@gmail.com | Nairobi, Kenya

SUMMARY

Computer Science graduate with hands-on experience building dashboards and data-driven tools for public sector performance management. Skilled in Angular, React.js, Python, PostgreSQL, and RESTful APIs, with a track record of translating raw operational data into clear, accurate interfaces that support real decision-making. Comfortable working independently and communicating technical constraints to non-technical stakeholders, with a strong attention to data accuracy and detail. Drawn to problems where the numbers need to hold up under scrutiny, trained further through cloud and network security coursework focused on secure, dependable systems.

SKILLS

Frontend: Angular, React.js, Next.js, JavaScript, HTML, CSS, Tailwind CSS **Backend & Data:** Node.js, Express, Python, Django, PostgreSQL, MongoDB, RESTful APIs **Tools:** Looker Studio, Figma, WordPress, Git

WORK EXPERIENCE

Software Developer | Nairobi County Government Feb. 2026 – Present

Project/Performance Information Management System (PIMS)

- Contributed to a county-level project tracking and financial reporting system using Angular, Django, PostgreSQL, and RESTful APIs.
- Built dynamic financial and performance reports, checking calculations and figures for accuracy before they reached county decision-makers.
- Performed database operations, data validation, backend integration, and system testing/debugging.

VenturePal System

- Assisted in developing an MSME innovation and investment platform (Angular, Django, PostgreSQL, API integrations), including registration and application workflows.
- Worked directly with stakeholders to translate requirements into functional features, explaining technical trade-offs in plain terms.

Presidential Digital Talent Programme (PDTP) Intern | ICT Authority – Nairobi City County Jan. 2025 – Dec. 2025

- Supported Angular frontend development for PIMS, integrated with Python/PostgreSQL backend services, focused on data accuracy and usability.
- Designed and implemented dynamic trackers and dashboards to monitor KPIs, timelines, and financial performance across departments.
- Cleaned and structured raw operational data from multiple Nairobi subcounties, then built interactive dashboards in Looker Studio, closely checking data accuracy at each stage to prevent misleading visualizations.

Junior Software Developer Intern | County Government of Baringo May 2023 – Jul. 2023

- Built and debugged front-end features in React.js, integrating with backend services via API requests.
- Collaborated with senior developers on performance optimization, code reviews, and application documentation.

EDUCATION

B.S. Computer Science, Second Class Honours (Upper Division) | Egerton University, Nakuru, Kenya Aug. 2020 – Nov. 2024

Relevant coursework: Structured Programming, Data Structures & Algorithms, OOP, Database Systems

ADDITIONAL

- Cyber Shujaa – Cloud and Network Security, 3-month intensive coursework in securing digital assets and cloud/network environments (Sep–Dec 2023).
- AgChain Hackathon (USAID / Virginia Tech / Purdue / Egerton University) – led the team to 3rd place building a crop pest/disease identification applet (Nov 2021).
- Languages: English, Swahili
